

## HOME VISIT CONSIDERATIONS DURING COVID

Updated: March 5, 2021

- No travel by air, bus, train, taxi or limousine.
- All current home visit protocols will remain in place.
  - I understand the testing requirements for travel out of New York State in a non-contiguous State.
  - I understand visitors to the household must comply with state testing/quarantine requirements.
  - The individual will complete a daily health screening during visit.
  - The individual must return during business hours.
- Each guest from outside the household should be screened prior to entering the home. To pass the screening they must be able to answer YES to question #1 and NO to the remaining questions:
  1. Have you fulfilled any and all testing and/or quarantine requirements prior to visit?
  2. Have you had close contact with a confirmed or suspected COVID-19 case in the past 14 days?
  3. Have you had a positive COVID-19 test within the past 14 days?
  4. Have you had COVID-19 symptoms within the past 14 days?
- During your visit please avoid the 3 C's
  - Closed Spaces
  - Crowded Places
  - Close Contact
- To return to the Village after travel to a contiguous state (PA, VT, MA, NJ, CT) or red/orange cluster zone, the individual must Quarantine (no visitors) at the family's home for 4 days prior to traveling to Edmeston. On the day of return, obtain a rapid test upon arrival in Edmeston. Pathfinder will assist with scheduling. **Please note, a positive result would require the resident to return home with the family for quarantine and re-test before returning.**
- Travel to New York State from a non-contiguous state, US territory or CDC level 2 or level 3 country, the traveler may test-out of the mandatory 10-day quarantine by:
  - Travelers must obtain a test within three days of departure, prior to arrival in New York.
  - The traveler must, upon arrival in New York, quarantine for three days.
  - On day 4 of their quarantine, the traveler must obtain another COVID test. If both tests come back negative, the traveler may exit quarantine early upon receipt of the second negative diagnostic test. If a rapid test is not available for second test, you may end up quarantining in NY for 7+ days.
  - Pathfinder will assist families locating testing and accommodations in New York State.
